Oklahoma Planted Acreage Down 1 Percent from Last Year

Oklahoma:

Total planted acreage for major crops in Oklahoma is down 1 percent from last year, according to the Oklahoma Field Office of USDA's NASS. Corn, sorghum, peanuts, soybeans and cotton show an increase in planted acreage while, oats, wheat, and rye show a decline.

Wheat planted acres are estimated at 5.7 million acres, down 3 percent from 2007. Acres harvested for grain, at 4.5 million, are up 29 percent from last year.

Oat planted acreage is estimated at 50,000 acres, down 30 thousand acres from last year. Acres harvested for grain are estimated at 30,000, 15 thousand acres above 2007.

Rye plantings are estimated at 250,000 acres, down 17 percent from 2007. Harvested acres, at 55,000, are 8 percent below last year.

Cotton planted acreage is estimated at 190,000 acres, up 9 percent from last year. The first harvested acreage forecast of the year will be issued on August 12, 2008.

Corn planted acres are estimated at 350,000 acres, up 9 percent from 2007. Acres for grain, at 320,000, are up 19 percent from last year.

Sorghum planted acres are estimated at 280,000 acres, up 17 percent from 2007. Acres for grain, at 260,000, are up 18 percent from last year.

Soybean planted acreage is estimated at 310,000 acres, up 68 percent from 2007. Harvested acres are expected to total 285,000 acres, 63 percent above last year.

Peanut planted acreage is estimated at 20,000, 11 percent above last year. Harvested acres are expected to total 19,000, up 12 percent from last year.

All hay acreage is estimated at 3.1 million, down 3 percent from 2007. **Alfalfa hay**, at 300,000 acres, is 21 percent below last year.

All other hay is forecast at 2.8 million acres, the same as last year.

Survey results are based on Oklahoma farmers and ranchers reports from the June Agricultural Survey conducted during the first two weeks of June 2008.

Acres Planted and To Be Harvested, Oklahoma, Final 2007 and June 2008

Crop	Planted Acreage for All Purposes			Harvested Acreage

United States Wheat Acreage Up 5 Percent

United States:

All wheat planted area is estimated at 63.5 million acres and harvested area at 46.6 million acres. The planted total is up 5 percent from 2007 and the harvested area is 4 percent above last year but down slightly from the previous estimate.

Corn planted for all purposes is estimated at 87.3 million acres, down 7 percent from 2007 when corn planted area was the highest since 1944. Growers expect to harvest 78.9 million acres for grain, down 9 percent from last year when harvested area was the highest since 1933. If realized, this would be the second highest since 1944, behind last year.

Area planted to **sorghum** for all purposes is estimated at 7.27 million acres, down 6 percent from 2007. Acreage expected for grain harvest at 6.41 million also down 6 percent last year.

The **soybean** planted area is estimated at 74.5 million acres, up 17 percent from last year. Area for harvest is estimated at 72.1 million acres, up 15 percent from 2007.

Acreage planted to **peanuts** in 2008 is estimated at 1.46 million acres, up 19 percent from 2007. Area for harvest is estimated at 1.43 million acres, compared with 1.20 million harvested last year.

All cotton plantings for 2008 are expected to total 9.25 million acres, 15 percent below 2007.

The area planted to **oats** last fall and this spring totaled 3.47 million acres, down 8 percent from last year's final seeded acres. Acreage to be harvested for grain is estimated at 1.44 million acres, 4 percent below last year.

Barley growers seeded 4.13 million acres for 2008, up 3 percent from a year ago. Harvested acreage is estimated at 3.64 million acres, up 4 percent from 2007.

The area planted to **rye** is estimated at 1.19 million acres, 14 percent below 2007. Harvested area is expected to total 266,000 acres, down 8 percent from a year ago.

Producers expect to harvest 60.4 million acres of **hay** in 2008, down 2 percent from 2007. **Alfalfa and alfalfa mixtures** are expected to total 20.8 million acres, down 4 percent from 2007. **All other hay** is estimated at 39.7 million acres, down 1 percent from last year.
